con un módulo óptico de Cristal Azul (Blue Glass) que elimina el reflejo fantasma en condiciones de luz desafiantes. Integra potentes algoritmos de aprendizaje profundo para reconocimiento facial y protección perimetral, además de contar con PTZ (Pan-Tilt-Rotate-Zoom) motorizado para una instalación y ajuste remoto precisos.

J.J.

**1. Módulo "Blue Glass" (Requisito Específico):**

- Esta cámara incorpora un filtro de cristal azul especial que reduce drásticamente los reflejos internos (ghosting) causados por fuentes luz fuertes directas, asegurando una imagen limpia crucial para el reconocimiento facial.

**2. Instalación Inteligente (PTRZ):**

- El sistema PTRZ (Pan-Tilt-Rotate-Zoom) permite a los instaladores montar la cámara y luego ajustar el ángulo de visión y la rotación de imagen de forma remota desde el software, reduciendo tiempos de mano de obra y necesidad de escaleras/elevadores para ajustes finos.

**3. Potencia Analítica (DeepinView):**

- Capaz de realizar Reconocimiento Facial en el borde (en la propia cámara) o capturar rostros con alta calidad para que el NVR los procese, optimizando la carga del sistema.

## Ítem 8. Switch de Acceso 24 puertos

### Descripción General

El DS-3E1528HP-SI-24P2T2F es un switch PoE Gigabit inteligente de 24 puertos de la serie Smart Managed de Hikvision. Diseñado para alta demanda de energía y transmisión de datos, ofrece un presupuesto PoE robusto de 370W, ideal para alimentar múltiples cámaras IP, incluyendo modelos PTZ o Fisheye. Integra funciones de gestión en la nube e topología de red visualizada y protección avanzada contra sobretensiones.

#### 1. Potencia PoE Superior (370W):

- Este modelo ofrece un alto presupuesto energético, suficiente para alimentar las 24 cámaras simultáneamente (incluso modelos de mayor consumo como las Fisheye o Varifocales Motorizadas del proyecto) sin riesgo de caída por falta de energía.

#### 2. Gestión y Mantenimiento Remoto:

- Compatible con Hik-Partner Pro para configuración y monitoreo remoto. Permite ver el estado de salud de la red, recibir notificaciones de alarma y realizar reinicios de puertos desde la app o web, reduciendo costos operativos.
3. **Transmisión de Largo Alcance (300m):**
- Al igual que el modelo de 16 puertos, permite conectar cámaras situadas a distancias superiores a los 100m estándar (hasta 300m) utilizando cable Cat.6, simplificando la infraestructura en grandes almacenes o pasillos largos.
4. **Fiabilidad Crítica (PoE Watchdog):**
- El sistema monitorea constantemente la comunicación con las cámaras. Si una cámara se "cuelga" y deja de transmitir datos, el switch reinicia automáticamente la alimentación de ese puerto para restablecer el servicio sin intervención humana.

## ▪ Function

### Face Capture

With embedded deep learning based algorithms, the camera is able to give the best shot of a target face through detecting, capturing, grading and selecting. The camera uses face exposure function to dynamically adjust face area exposure of captures and ensures high face picture quality.

### Perimeter Protection

With embedded deep learning based target detection and classification algorithms, the camera carries out the duty of perimeter protection, monitoring the actions of line crossing, intrusion, region entrance, and region exiting. The algorithms greatly filter out the mistaken alarm caused by the interference of leaves, lights, animal, flag, etc.

### Multi-Target-Type Detection

With the embedded deep learning algorithms, the camera detects and captures the face, human body, vehicle in the specified region.

### Queue Management

With embedded deep learning based algorithms, the camera detects queuing-up people number and waiting time of each person. It can generate reports to compare the efficiency of different queuing-ups and display the changing status of one queue, and supports raw data export for further analysis.

### Regional People Counting

With the embedded deep learning algorithms, the camera supports people density detection and will upload detection data through scheduled uploading, number of people change uploading and congestion level uploading. It also supports number of people exception detection and waiting time exception detection.

### On/Off Duty Detection

With the embedded deep learning algorithms, the camera supports absence detection and on/off duty detection. It can detect the on/off duty status and people number changes in a predefined area.

### Heat Map

The camera can generate a graphic description of visits (by calculating amount of people or amount of dwell time) in a configured area.

### Multi-Dimension People Counting

With the embedded deep learning algorithms, the camera integrates multiple intelligences. It counts persons and compares them with the built-in face picture library to remove duplicates. It counts persons and reports an alarm simultaneously to achieve both the entrance control and people counting.

### Hard Hat Detection

With the embedded deep learning algorithms, the camera detects the persons in the specified region. It detects whether the person is wearing a hard hat, and reports an alarm if not.

**DS-2CD6365G1-IVS**  
**6 MP DeepinView IR Network Fisheye Camera****DeepinView**<sup>series</sup>

DS-2CD6365G1-IVS is a fisheye network camera capable of providing a 360-degree panoramic image of its scene. The progressive scan CMOS sensor provides high-resolution images of up to 2560 × 2560. Up to 20 live view display modes, designed for 3 mount types, meet various user preferences. Three independently controlled IR lights offer a range of 15 m and provide good vision in low or even zero-light environment.

- Heatmap: based on deep learning algorithms, the camera counts people and presents an intuitive map
- Multi dewarping modes: the image can be dewarped to normal image for viewing intuitively
- Built-in mic and speaker: the camera supports two-way audio for real-time audio security monitoring and communication
- Built-in IR light: an IR range of 15 meters provides good visibility in low or even zero-light environments
- High resolution 6 MP: capturing clear images even when dewarped into 4-image PTZ mode
- Each image is clear and detailed
- Water and dust resistant (IP67) and vandal resistant (IK10)
